❖ Conclusion:

It is worth mentioning that the previous statistics were done by the documentation and statistics team of the Action Group for Palestinians of Syria, as the numbers are likely to increase because of the tense situation that preventing the documentation of all cases.

Many residents are reluctant to communicate with authorities about human rights for fear of harassment, as well as the difficulty of moving and communications also preventing, in many cases, without collecting adequate information about the victims.

In addition, a large number of missing people who were lost during the disaster of sinking "boats of death" in the Mediterranean early on October 2013, where hundreds of remains Palestinian Syrian refugees who were on board are missing.

On the other hand, it should be noted that most reasons that led to the death of (3031) Palestinian victims are still exist, since many Palestinian refugee camps are still exposed to Shelling between now and then in addition to the continued siege imposed on the Yarmouk camp.

The AGPS confirms that this report concerns about documenting the statistics of Palestinian refugee victims in Syria since the beginning of events till the end of September 2015, with no concern about identifying the actual doer.
