Meanwhile, heavy clashes broke out in the Yarmouk camp in Damascus, between the armed groups inside the camp and the regular army alongside with the General Command on the Yarmouk municipality crossing in Palestine Street. These clashes coincided with a number of shells that targeted the vicinity of the Yarmouk High School at the martyr Jalal Kaoush Street.

On the other hand, UNRWA has distributed a limited quantity of aids to the residents of the camp after they stop distributing aid for five days respectively, these comes in the light of the continued water cut all around the camp for the tenth day respectively. The water cut led to the emergence of many diseases, according to a medical source inside the camp to our correspondent, such as kidney disease, swelling of the colon because of the lack of clean drinking water and contamination.

On a different context , the residents of Khan Al Sheih camp are suffering of the continuing tense security situation in the areas adjacent to them, making their camp vulnerable to bombardment and fall of a number of shells and explosive barrels, which resulted in many victims and injured.

Meanwhile, the residents are complaining of the continuous snipping and bombing that targets " Zakia road", which is the only road that connects between the camp and its vicinity. The bombing of Zakia road impacted negatively on their standard of living and create many crises including acute shortage of medical and food supplies because of frequent closure of roads linking between the camp and the city of Damascus.

UNRWA

The UNRWA issued a statement in which it denied what has been traded from the news recently, to accept applications for immigration related to Palestinian refugees from Syria. UNRWA emphasized in its statement that this news is fabricated and incorrect, and at the end of its statement, UNRWA appealed to all Palestinian refugees to be accurate and to make

sure of the news sources attributed to them before publication in order to avoid provoking arguments amongst the Palestinian refugees.

In a related context, there is a situation of discontent and dissatisfaction amongst Palestinian refugees displaced from Syria to Lebanon towards UNRWA as a result of its recent decision that eliminates aid cut relating to accommodation and food from next month of October 2014. This decision was under the arguments invoked by UNRWA, such as "non-applicability of Terms receive assistance to those families, "and that after the last census survey, which was carried out by a team of volunteers during July last year.

The refugees also complain of UNRWA neglecting of Palestinian refugees, and do not bear full responsibility towards them, especially in the medical and education field. Thus, UNRWA announced of charging the ATM cards for Palestinian refugees from Syria who had written down their information with the agency until 30th of June 2014. It is referred that the number of Palestinian Syrian refugees displaced to Lebanon, according to UNRWA statistics amounted to about 51 thousand people, approximately 14 thousand families.
