This comes amid news about that the Lebanese General Security refused to renew the residency permits for many Palestinians who fled from Syria to Lebanon, where they were informed that they must leave Lebanon.

For their part, the Palestinian Syrian refugees in Lebanon renewed their demanding to the Lebanese official authorities, the Palestinian Embassy in Lebanon, the PLO, and the Palestinian factions to work to solve the problem faced by their children in each academic year.

It is worth mentioning that the Palestinians of Syria in Lebanon suffer from many legal and living problems, such as residencies, high cost of living, and the lack of employment opportunities.

Moreover, they are treated according to volatile policies especially by the public security, sometimes they issue a decision to renew residency for two or three months and when the Palestinian refugees apply for it, it may take one or two months, as the refugees receive it they find that the period granted to them is nearing to end.

Daraa camp

In Daraa, the frequent shelling and sniping that targeted Daraa camp southern Syria since the beginning of the war, have led to the destruction of nearly (70%) of the camp's buildings. The rest of the refugees inside the camp are living in a severely dangerous humanitarian crises, most permanent is health and living aspects.

In terms of health aspect, there is no hospital or medical center in the camp, in addition to the severe shortage of medicine medical materials and equipment for first aid, in addition to the lack of ambulances to transport the injured to receive treatment outside the camp. However, the sniper of the regular army impede the arrival of ambulances, and when

the residents manage to transfer a patient outside the camp, Jordan refuses the entry of any Palestinian refugees from Syria even the injuries.

In front of this deteriorated health situation a number of activists inside the camp warned of the spread of disease among the people, especially with having to use contaminated drinking water, due to the lack of drinking water at the camp since about 341 days.
