## **Europe**

*The European Commission announced yesterday a new plan consists of 17 items to face the flow of refugees to Europe. The agreement was announced after a mini-summit in Brussels included countries of the European Union and a number of Balkan countries the day before yesterday.*

*According to media sources, the main points which are set out in the plan concentrated on improving the daily exchange of information including mobility through the Western Balkans route, preventing the movement of refugees from another country without informing the second country, and improving the reception conditions of migrants especially by increasing the capacity to 100,000 immigrants in Greece (50,000 currently) and in the Western Balkans (50,000).*

*The agreement also included strengthening the efforts to facilitate the return of immigrants who are not in need for international protection, as well as enhancing the cooperation for the return of deported immigrants to third countries, and intensifying cooperation with Bangladesh, Afghanistan, and Pakistan. In addition, combating smuggling and trafficking of human beings by the help of Front ex Interpol, and European police.*

*It was also agreed on enhancing the cooperation between the international and financial institutions to support the financial efforts of the concerned countries, in addition, meeting the flow of migrants by insuring full capacity to register them through maximum use of biometric data in cooperation with the European agencies to exchange information.*

*The European Commission President, Jean-Claude Juncker, said in a press conference: "We made clear the policy of just passing people" referring to the cooperation agreements and avoiding individual national actions that contributed in the chaos across the region.*

### ***Recent Update***

*The remained medical cadres in the Yarmouk camp called for the introduction of fuel and its diversities to the camp after the increase in the number of burn injuries among residents of the camp and the death of a number of them by burning because of the gasoline industry.*

*Many residents of the camp were forced to secure gasoline and extract it through the distillation of plastic after burning it with a mixture of carpet, covers, sponges, and others despite great dangers that are resulted from the extraction process. Some direct dangers of this process may include gas explosion caused by the distillation process and the resulting burns some of which were third-class and led to the death according to the medical cadres.*

*One of the doctors said that" the other resulting materials such as first carbon sulfur dioxide, hydrocarbons, and some small grains lead to the*

*immediate effects on the respiratory system by the lack of hypoxia, asthma, bronchitis and other allergic diseases, as well as the future influences especially the lung cancer".*

*The medical commissions in the Yarmouk camp for Palestinian refugee in Damascus announced the full running out of medical supplies and medicines from the besieged camp, warning from the interruption of first aid services in less than a week, in addition to the need for fuel to run generators, the only source for medical centers and in treating residents.*

*The Syrian army and its loyal groups targeted the locations of Al- Nasrah Front groups over clashes axis in the besieged Yarmouk camp. The conflicting areas are experiencing violent clashes between the two sides and attempts of each side to achieve progress.*

*This coincides with the continuous siege of the regular army and groups of the General Command for 847 days respectively, power outages for more than 917 days, and water cut for 407days respectively.*

*In Damascus suburb, residents of Khan Danoon camp are suffering from transportation. Employers, workers, and students of the camp cannot access their business, jobs, schools, and universities on time due to the lack of buses forcing them to leave their homes at five o'clock in the morning to reach at eight o'clock.*

*The residents of the camp demanded the stakeholders across many social network websites to resolve their problem and forming a delegation of notables of the camp to meet with stakeholders in Damascus suburb and to follow up the case. They also said that the solution lies in organizing the passenger buses, or specializing buses for internal transfer that come daily every morning to transfer students, workers, and others.*

*It is noteworthy that residents of Khan Danoon camp are experiencing miserable living conditions as a result of lack of basic services, shortage of bread, and continuous electricity, water, and telecommunications outages for long periods up to more than 16 hours a day.*

*Turning to the Syrian north, Al-Nairab camp witnessed a significant rise in the prices of materials due to the closure of roads leading to the city of Aleppo and Aleppo main Sherian Khanasser road, where the price of a kilo of tomatoes reached 1\$ which was 0.2\$ before, while some shops owners*

*started monopolizing food commodities and fuel in anticipation of selling them expensively if the road remained closed.*

*The connecting road between Al- Neirab and the city of Aleppo was closed after the progress of the armed opposition groups on the Sheikh Saeed and Ramouseh road, while residents and university students of Al-Neirab camp are waiting in Aleppo for the road to be open which witnesses acts of unstable actions between the Syrian army and armed opposition groups.*

*It is noteworthy that the camp is witnessing a state of instability and unsafety due to the tense security situation in the adjacent areas. The location of Al-Nairab adjacent to the Neirab military airport made it a strategic location for the conflicting parties in Syria which was subjected to bombing and shooting which led to many casualties.*

### ***Civil Work Committees***

*A Delegation of Al Wafaa European campaign and a number of participating organizations in the relief convoy arrived yesterday to the Greek Island of Mytileneto fellow- up the conditions of refugees who escaped from the war and arrived to the island by sea from the neighboring countries.*

*According to the campaign, the relief delegation will visit the camps in the island in order to fellow- up the conditions of the refugees and to work on providing food and relief materials.*

*It is worth mentioning that the Greek Island of Mytileneis one of the first points in Greece in which the refugees who move through the sea reach in an effort to access Europe.*

### ***Numbers and Statistics till 27/10/2015***

- *15,500 Palestinian Syrian refugees in Jordan, 45,000 Palestinian Syrian refugees in Lebanon, and 6,000 refugees in Egypt, according to the UNRWA's statistics till July 2015.*
- *At least 36,000 Palestinian Syrian refugees have reached Europe during the last 4 years.*
- *The Yarmouk Camp: - Siege, imposed by the Regular Army and PFGC, continued for 847 days respectively. In addition, power cuts continued for more than 917 days, water was cut for 407 days respectively. The number of victims due to the siege has reached to 182 victims.*
- *Al Sbeina Camp: - Regular Army is still preventing the residents of the camp to return back to their houses for 708 days respectively.*
- *Handarat Camp: - Residents have left the camp for 909 days after the Syrian Opposition Groups controlled it.*
- *Dara'a Camp: - It is now almost 553 days without water and 70% of its buildings were demolished.*

<http://www.facebook.com/ActGroup.PalSyria>

- *Jarmana, AL Saieda Zainab, Al Raml, Al Aedein Camps in Homs and Hamma: - A relatively quiet situation in light of the economic crises.*
- *Khan Al Sheih Camp: - Roads linking the camp to the city center are still closed except for Zakia- Khan Al Shieh road.*
